

ASBESTOS CLOTH – TECHNICAL DATASHEET

Asbestos Cloth is a high-temperature resistant insulation material manufactured from long chrysotile asbestos fibers. It is widely used in industrial environments requiring thermal protection and fire resistance.

Parameter	Specification
Material	Asbestos (Chrysotile Fiber)
Thickness	1.5 mm to 6 mm
Width	1 Meter
Roll Length	2 to 20 Meters
Temperature Resistance	325°C to 350°C
Color	White
Form	Roll

Applications:

- Wrapping rubber hoses
- Water-cooled cable protection
- Foundry and steel plant insulation
- Furnace thermal shielding
