

ASBESTOS ROPE – TECHNICAL DATASHEET

Asbestos Rope is a high-temperature resistant sealing and insulation material made from long chrysotile asbestos fibers. It is widely used for thermal insulation, sealing, and gasketing in high-temperature industrial environments.

Parameter	Specification
Material	Asbestos
Type	Round
Diameter	3 mm to 12 mm
Length	10 to 50 Meters
Temperature Resistance	325°C to 350°C
Color	White
Form	Coil

Applications:

- Furnace door sealing
- Boiler and kiln insulation
- Expansion joint packing
- Thermal insulation in foundries and steel plants
