

REXNORD AC AXIAL FAN DATASHEET

Industrial AC axial cooling fan designed for electrical panels, induction furnace systems, industrial automation equipment, and cooling applications requiring reliable airflow and continuous operation.

Parameter	Specification
Brand	REXNORD
Product Type	AC Axial Cooling Fan
Fan Size	120 x 120 x 38 mm
Voltage	110V AC / 115V AC
Frequency	50/60 Hz
Bearing Type	Ball Bearing / Sleeve Bearing
Speed	Approx. 2650 – 2850 RPM
Air Flow	Approx. 100 – 107 CFM
Noise Level	Approx. 45 – 48 dB(A)
Housing Material	Die Cast Aluminum
Impeller Material	Industrial Plastic
Motor Type	Shaded Pole Motor
Mounting	Panel Mount
Application	Industrial Cooling

Applications:

- Electrical Control Panels
- Induction Furnace Panels
- Industrial Automation Systems
- Cooling & Ventilation Systems
- UPS & Power Supply Cooling
- Industrial Machinery

Key Features:

- High Airflow Performance
- Continuous Duty Operation
- Heavy Duty Industrial Construction
- Reliable Cooling Performance
- Compact Panel Mount Design
- Long Operational Life
