

TECHNICAL DATASHEET

Composition: Duplon high pressure hose (water hose) is made of reinforcement (Braiding) of synthetic yarn in between two or more layers of Soft PVC. The yarn is reinforced in crosswise as well as in longitudinal directions. This provides high pressure carrying capacity as well as good flexibility.

Size (mm)	Wall Thickness (mm)	Working Pressure @ 30°C (kg/cm ²)	Standard Length (mtrs.)
10	3.5	25	50 / 100
12	3.6	20	50 / 100
